SUMMARY

Results-driven Frontend Developer with over 2 years of experience in building dynamic, responsive web applications. Skilled in JavaScript, TypeScript, and React frameworks, with a focus on modular, component-based architecture and performance-optimized solutions. Demonstrated ability to collaborate with cross-functional teams, implement RESTful APIs, and uphold high standards in UI/UX practices and development quality.

SKILLS

- **Frontend:** HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, Context API, Hooks, Object-Oriented JavaScript, SPA development, Component-Based Architecture
- **Responsive Design:** CSS Grid, Flexbox, Tailwind CSS, Bootstrap, Media Queries, Mobile-First Design, WCAG Compliance
- **APIs:** RESTful APIs, GraphQL, WebSocket
- **Build & Optimization:** Webpack, Babel, Vite, Lazy Loading, Code Splitting, Memoization, Bundle Size Reduction
- **Version Control:** Git, GitHub, Bitbucket
- **Testing:** Jest, React Testing Library, New Relic, Datadog
- **DevOps:** AWS (basics), Docker, Jenkins
- **Collaboration:** Microsoft Teams, Slack, Jira, Confluence, Kanban, Agile

WORK EXPERIENCE

Autovalue Systems

Associate Software Engineer

Bengaluru, Karnataka

Dec 2021 - Present

- Led the end-to-end SDLC for frontend projects, designing modular React components for scalability and maintainability.
- Integrated RESTful and GraphQL APIs, enhancing data efficiency by **25%** and optimizing navigation flow.
- Increased user engagement by **30%** through responsive, WCAG-compliant UIs crafted with CSS Grid, Flexbox, and Tailwind.
- Boosted page load speed by **20%** by implementing splitting and lazy loading techniques with Webpack and Babel.

PROJECTS

E-commerce Industry – E-commerce Platform

- Built product listing and checkout pages with React, HTML, CSS, and JavaScript.
- Increased user experience by **30%** through real-time updates via REST APIs, utilizing Flexbox and Grid.

Retail Industry – Inventory Management System

- Developed reusable React components and enabled live stock updates via REST APIs, leading to a **20%** reduction in inventory inaccuracies.
- Enhanced application reliability with TypeScript, supporting collaborative development efforts.

EDUCATION

Bachelor of Science in Computer Science

St. Joseph's College

Bengaluru, Karnataka

2021

ACTIVITIES, AWARDS & EXTRACURRICULAR

- Cleared TCS National Qualifier Test (NQT) 2020
- NCC Cadet (2014)
